2. The attached chart presents the agreed upon priorities for the consolidated requirements established by the Committee. The relationship of the measurements previously completed by SMS to these requirements is indicated by various symbols used in the chart. Current FY65-66 plans are also indicated. It is anticipated that SMS programs will be guided by the findings of the Committee. It is further recognized that the changing situation will from time to time require a revision of the priorities or the practicality of attacking one or other of the listed items and also that new items may come to light for consideration.
